

Sonovision Aetos Technical Services Pvt Ltd

About the Company:

Founded in 1948, Sonovision is a leading engineering and technical services provider, headquartered in Aix en Provence, France. Today, Sonovision has more than 1,300 employees in 25 locations in eight countries across Europe, North America and Asia, with a turnover of €100 million.

Sonovision is part of Ortec Group, a global engineering conglomerate providing services in construction, energy and environment industries. Ortec group has more than 13,000 people spread over 150 branches worldwide, generating annual revenue of over €1.3 B.

Our historical and core expertise lies in the design and production of technical data for aerospace, defense and commercial applications. Sonovision also operates in other critical industries such as space, railways, marine and energy industries. Services include engineering support, customized training solutions, integrated product support, graphic design and animation that form part of our communication and marketing portfolio.

Sonovision supports its clients from product feasibility and design phase through to the creation of technical content, training and customer service support to optimize field operations, such as maintenance, generating synergies in costs, skills and innovation.

Sonovision group has its presence in Bangalore, India since 2005 with over 500 people supporting global projects. The company is certified for EN 9100 and ISO9001 complying to the group's policy, harmonizing the processes across our network.

The company has been growing consistently with a constant rise in its client base and productivity, ever since it has been established.

Our core strength is its highly skilled talents that we invest in and which is vital to respond to our various customer demands in the most responsible manner. Sonovision values its employee base and encourages work life balance.
